

# LLM judge bias audit

Slice judge accuracy by response and task features

## Position bias

**Symptom:**  
A/B order changes  
the winner

**Audit:**  
Swap order; expect  
stable winner

## Length bias

**Symptom:**  
Longer answers  
score higher

**Audit:**  
Bucket by output  
length

## Confidence bias

**Symptom:**  
Assertive tone  
looks correct

**Audit:**  
Compare evidence  
vs. wording

## Self-preference

**Symptom:**  
Judge prefers its  
own model style

**Audit:**  
Use a different  
model/provider

## Example slice accuracy
