

Three programming surfaces

Author synthesis grounded in the lecture's Software 1.0, 2.0, and 3.0 framing

Software 1.0

Developer shapes

Explicit algorithm

Machine executes
deterministic steps

Software 2.0

Developer shapes
Complementary programming surfaces

Dataset + objective

Training compiles
behavior into weights

Software 3.0

Developer shapes

Prompt + context

Model conditions
behavior at runtime

Conventional code, data pipelines, evaluation, and deployment remain surrounding infrastructure.
